ONE COPY—ONE CENT.

It's easy enough to be pleasant,
And spend all your time being jolly;
But the man worth while
Is the man who can smile
When his wife finds a letter signed
"Dolly."

Satan is coming.

Ready to supply your every want. Such names
as "Oliver," "Syracuse" and "Eagle," the latter
made by the James H. Hall Plow Co., this city,
are too well known to you farmers for us to say
more. All we say is "Come in and buy. You
are very welcome."

Mike Brown's Plow Harness

Needs no recommendation. You farmers know
that the auctioneer's "this is a set of Mike Brown's
hand-made harness" at sales is enough to make
the second-hand harness sell for more than was
paid for it when it was new. It's a fact. We are
still making good harness and want to sell more
this year than ever before. Come in.

FIRE SCARE IN GRAVE ALLEY.

A defective flue caused a slight blaze
at the home of Uncle John Washington,
colored, in Grave alley, north of West
Second street, about 8 o'clock this
morning.

The fire department soon had it under
control. Water caused more damage
than the fire.

POLICE COURT MATTERS.

Police Judge Whitaker handed out
the following fines yesterday:

Russell Wright, drunk and disorderly,
\$10.50.

Thomas Irwin, plain drunk, \$6.50.

William Sharp, disorderly conduct,
\$6.50.

Lillian Breckinridge, the lady of color
who tried the forged check racket will
have her trial today.

Thomas Murphy, claiming Augusta as
his home, said he was drinking. He went
into one of the saloons and went to
sleep. When Thomas woke up, he said
he was shy his wallet and the \$11 there-
in, and all he had left was 5 cents. He
did not know where the saloon is nor
who got his money. Moral—Thomas,
never, never go to sleep in a saloon.

MISS ELIZABETH HELMER

Esteemed Resident of This City Passed
Away Last Evening.

Miss Elizabeth Helmer, aged 59, passed
away last evening at 6:30 o'clock

PASSING OF RHEUMATISM.

According to Dr. William Brady, writing for the New York Independent, rheumatism is about ended. That does not mean that you will not be attacked by aches and pains. It means that such aches and pains are the reflection of bacterial infection, and that they are not due to dampness, cold or other formerly assigned causes.

Dr. Brady shows that an infected tonsil may cause "inflammatory rheumatism" which yield to the treatment of the affected organ. There are various recognized bacterial causes of rheumatism. The weather, according to this authority, has nothing to do with it. Many remedies, he says, do not hit the spot. They must be supplanted by medical or surgical treatment based upon proper diagnosis.

LIFE'S THREE QUESTIONS.

The three great questions of life are, "Is it right or wrong? Is it true or false? Is it beautiful or ugly?" These our education should help us to answer, and in so much as it fails it will lack in reaching a proper physical and moral standard. When the college girl returns to her home, whether it be her parents' or her own, her college training should have fitted her to answer these questions in relation to the fundamental needs of life, in food, clothing, and shelter. This education I believe the teachings of home economics to give. General culture not alone means the capacity to understand and appreciate, but to react on the resources and problems of modern civilization, and these problems in the large mean the preservation of health, the prompting of physical vigor, and the material well-being of the race.—Harper's Bazar.

WEIGHT OF THE GROCERY TRAY.

A Chicago man is endeavoring to work up a crusade among pure food officials against the wooden trays so generally used by grocers and butchers in selling butter, lard, meats and other goods.

The use of these trays, it is alleged, is a fraud against the customer, as the weight of the tray usually is included in weighing out goods of the character named. Another objection is that the trays are likely to be insanitary, as usually they are laid about loosely on counters and elsewhere with no precautions to protect them from dust, germs or other sources of contamination.

These trays, of course, do not weigh much, but the pure food laws in a number of States prescribe that a customer's pound of any article must not include the weight of the tray in which it is sold. As to how well such laws are enforced that is another question. The Chicago man who is fulminating against the use of the trays claims that they result in the consumer getting short weight. In many communities, he says, neither the dealer nor the purchaser pays any attention to the matter. This would mean that the consumer pays for a tray every time he buys butter or lard, or anything that is weighed out in a tray,—and, of course, at an exorbitant figure.

The Chicagoan figures that a billion trays are used in this country every year and that their total weight is 50,000,000 lbs. "At an average of 3 cents a pound these wooden trays cost the dealer \$1,500,000; but weighed in with the food products sold and averaged at a price only 13 cents a pound they aggregate \$6,500,000." This is a loss of \$5,000,000 a year to the consumers, or an average of 5 cents for every man, woman and child in the United States.

The average housekeeper will not regard it worth while to raise a row about a tax of such small dimensions. It is but one of many in which the consumer gets a little the worst of it in the purchase of supplies. These little practices add to the cost of living and they come very well within the scope of food-law regulation.—Courier-Journal.

WISHED SHE COULD DIE

And Be Free From Her Troubles, but Finds Better Way.

Columbia, Tenn.—"Many a time," says Mrs. Jessie Sharp, of this place, "I wished I would die and be relieved of my suffering from womanly troubles. I could not get up, without pulling at something to help me, and stayed in bed most of the time. I could not do my housework."

The least amount of work tired me out. My head would swim, and I would tremble for an hour or more. Finally, I took Cardui, the woman's tonic, and I am not bothered with pains any more, and I don't have to go to bed. In fact, I am sound and well of all my troubles. Cardui goes to all the weak spots and helps to make them strong. It acts with me—not against her. It is for the nervous, irritable women, who feel everything were wrong, and need to quiet their nerves and get a worn-out system.

Man, suffering from any of the common ailments of womanly life, it will help you.

MAKING FILM PICTURES OF FLYING BULLET.

An apparatus capable of making film pictures at the rate of 100,000 a second has been invented, and with it some remarkable pictures have been made. In one case 72 consecutive views of a bullet fired from a revolver were taken while the bullet was passing through a space of ten inches. This bullet was fired through a thin piece of wood, and the film showed a curious situation. The wood did not show any effect from the impact of the bullet until the bullet had passed completely through it. Then splinters began to form, the stick split, and finally fell to pieces. No camera shutters can be used with this apparatus. A series of electric sparks are flashed at the rate of 100,000 a second and a picture is made with each flash. The film is carried on a wheel 3 feet in diameter that makes 9,000 revolutions a minute.—From the March number of Popular Mechanics Magazine.

The Bureau of Navigation reports 644 sailing, steam and unrigged vessels of 163,849 gross tons built in the United States and officially numbered during the six months ended December 31, 1913.

The Democratic party has lived down its slavery record. It has lived down its secession record. It has lived down its silver record. But it has not lived down its spoils record.—New York World.

THE RADIUM IMBROGLIO.

The radium imbroglio seems now to be in a fair way of settlement. Out of the volumes of nonsense that has been talked, some things stand out clearly. If radium be indestructible (in practical consideration), beautiful in supply in Colorado (which is doubtful) and of incalculable value to humanity (which is still questionable), its conservation in the earth is manifestly undesirable, says the editor of The Engineering and Mining Journal. On the contrary, the sooner all of Colorado's radium can be extracted, the better off shall we be. However, the Department of the Interior never had any serious idea of withdrawing the radium lands. It wants simply to go into the radium business, build a factory, buy ores, treat them, regulate prices, etc. This is to be the first step in the governmental operation of metallurgical works, and is in line with the talk of the governmental ownership and operation of railroads, telegraphs, and all the rest. The fact that the government operates its own great monopolistic enterprise, the post office, in an admittedly inefficient manner, does not deter the advocates of governmental operation of all things.—The Engineering and Mining Journal.

Has got your girl,
Don't worry; there's plenty more.

I.
Beautiful Mrs. Monterey Finkledale, a picture beyond words in her Danish mezzanine tango gown, crept stealthily along the edge of the ballroom floor, and, unobserved, made her way into the gentleman's cloak room.

With a rapid, snake-like gesture, she seized a high silk hat and thrust it into the blazing open fireplace.

Then, still stealthily, she rejoined the brilliant assemblage on the ballroom floor.

II.
"Ah, here you are!" cried Sowerby Spills, the best dancer in the younger set. "I have been looking all over for you."

"I have been waiting for you," said Mrs. Finkledale reproachfully, and they sailed off as only two perfect tangoers can sail off.

III.
Her husband hunted her up at the end of that dance. He looked tired. She had married him for his money plus his age, which was seventy-six.

"It's time to go now," he yawned. "You promised to go early."

"Certainly, Sprudles," she returned sweetly. "Go find your hat and coat and I'll be ready."—Louisville Times.

AFTER SUFFERING TWO LONG YEARS

Mrs. Aselin Was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Minneapolis, Minn.—"After my little one was born I was sick with pains in my sides which the doctors said were caused by inflammation. I suffered a great deal every month and grew very thin. I was under the doctor's care for two long years without any benefit. Finally after repeated suggestions to try it we got Lydia E. Pinkham's Vegetable Compound. After taking the third bottle of the Compound I was able to do my housework and today I am strong and healthy again. I will answer letters if anyone wishes to know about my case."—Mrs. JOSEPH ASELIN, 624 Monroe St., N.E., Minneapolis, Minn.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and today holds the record of being the most successful remedy we know for woman's ills. If you need such a medicine why don't you try it?

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

THE BIGGEST GOAT OF ALL.

Twenty-seven candidates from Portsmouth will be numbered in the large class of candidates that will receive the Scottish Rite degree at the February re-naming of the Cincinnati Consistory, Ancient and Accepted Order of Scottish Rite Masons, which will be held this afternoon at 1 o'clock, and concluding with an elegant banquet Friday evening.

Rev. J. M. Lital, pastor of the Third Street M. E. Church, this city, will also be given the 32nd degree at the same time.

A COUNTY-BURDENED STATE.

(Mayfield Messenger.)
There are 129 counties in the State, eighty of which are pauper counties.

In the First Congressional district there are thirteen counties, eleven of which are pauper counties.

A pauper county is one in which expenses exceed the net revenues. Hickman is a net revenue-paying county by only \$174, and McCracken county by the nice sum of \$15,760.69, and these are the only counties in this district that are not on the pauper list.

The following counties are non-revenue-paying counties by the following sums:

Ballard, by \$3,456.12; Caldwell, by \$4,885.20; Calloway, by \$11,600.04; Carlisle, by \$913.49; Crittenden, by \$5,026.17; Fulton, by \$773.74; Graves, by \$6,113.14; Livingston, by \$2,788.29; Lyon, by \$7,475.45; Marshall, by \$9,943.30; Trigg, by \$8,324.03.

It will be observed that Calloway and Marshall counties drop into the pauper class with a thud. Calloway falls behind by \$11,600.04 and the small county of Marshall by \$9,943.30, and the little county of Lyon by \$7,475.45.

These figures are taken from the Auditor's report for the fiscal year ending June 30, 1913, and the truth is there is not a county in this district that should be in the pauper list, much less by such large sums as are named above.

It does look like if the business of these counties were conducted as a good business man would conduct his own business the counties would not fall behind so much each year.

THE FOLLOWING LETTER "FROM MISSOURI" CARRIES ITS OWN EXPLANATION.

Willow Springs, Mo., Feb. 18, 1914.
Merz Bros., Maysville, Ky.
Gentlemen:

I am enclosing you check for \$3.12 in payment for tobacco cotton. I am having an acre of tobacco grown. If my experiment proves that this land will grow tobacco, as I think it will. I am going to bring this crop to Maysville and let the farmers of Mason and adjoining counties see what can be grown on land which at present its cash value is not more than \$12.50 per acre.

Yours truly,
B. F. THOMAS.

The writer of the above is a former Maysvillian and is a son of Mr. J. C. Thomas of Forest avenue.

FRAIL, SICKLY CHILD

Restored To Health By Vinol—A Letter To Mothers.

Anxious mothers often wonder why their children are so pale, thin and nervous and have so little appetite. For the benefit of such mothers in this vicinity we publish the following:

Mrs. M. L. Cassidy, of Thomasville, Ga., says: "My little daughter was anemic, delicate and nervous, she had no appetite and seemed listless. We could not seem to find anything that would help her until we were advised to give her Vinol. Inside of two weeks after taking it she showed a marked improvement, both in appetite, vim and looks. I continued giving it to her and words fail to express my gratitude for what Vinol has done for her."

This child's recovery was due to the combined action of the medicinal elements extracted from cods' livers, combined with the blood making and strength creating properties of tonic iron contained in Vinol.

Vinol will build up and strengthen delicate children, old people, and the weak, run-down and debilitated. We return the money in every case where it fails. J. C. Pacer, Druggist, Maysville, P. S.—Eccentric Sufferers! We guarantee our new skin remedy, Saxo.

Orange and lemon growers about Los Angeles suffered heavy damage by storms, entire groves floating off in the torrents.

ARE WOMEN NATURALLY DESPONDENT?

A prominent writer so claims. Women are constituted with a delicate organism and in nine cases out of ten mental depression may be attributed to an abnormal condition of the system which expresses itself in nervousness, sleeplessness, backache, headaches, causing constant misery and as a result despondency. Lydia E. Pinkham's Vegetable Compound, a simple remedy made from roots and herbs, is the one great remedy for this condition. It goes to the root of the trouble and overcomes despondency.

TWELVE CITIES WITH OVER 40,000 NEGRO POPULATION

There are twelve cities in the United States with more than 40,000 colored people, according to the census of 1910. Washington, D. C., contains the largest number, 94,446, while New York is second, with 91,709. The third largest colored population in any one locality is in New Orleans, La., where 89,262 reside. Baltimore has 84,749, and Philadelphia 84,459. The seven remaining cities contain the following numbers: Memphis, 52,441; Birmingham, 52,305; Atlanta, 51,902; Richmond, 46,733; Chicago, 44,103; St. Louis, 43,960; Louisville 40,522. It will thus be seen that New York contains a larger population of negroes than New Orleans and very nearly twice as many as Richmond.

HENS MUST LAY MORE EGGS

Uncle Sam Turns a Searching Eye Upon Indifferent Biddies.

Washington, D. C.—How to make hens lay more eggs is one of the multitudinous investigations authorized in the agricultural appropriation bill reported Friday. Congressmen will continue to distribute free seeds, the weather bureau service will be extended to the Panama canal and insular possessions, more than \$200,000 will be spent studying how to eliminate the waste and profits in foodstuffs between the producer and the consumer and a general reorganization of the department of agriculture along lines of greater efficiency is laid down by Secretary Houston, who is authorized, in appropriations aggregating \$25,000,000.

The Foreign Christian Missionary of the Christian Church is doing a great work in Japan where there are but 70,000 Protestants and 92,000 Roman Catholics out of a population of 47,000,000. Most of the people are Shintoists and Buddhists. By day schools and Sunday Schools conducted by the missionaries many are led to accept Christ and his religion. The graduates of these schools become enthusiastic Christian workers. The members of all the Christian Churches are asked to give something to help support this great work. The regular time for this foreign offering is in March.

MUST PAY THAT TAX.

Washington.—The commissioner of internal revenue sent instructions to all collectors of the income tax calling attention to the requirement of the law that the returns on incomes from March 1 to December 31, 1913, be filed on or before March 1, 1914. The instructions recite the penalties to be inflicted on individuals or corporations failing to make the proper returns. The only excuse which any official is authorized under the law to accept for failure to make the returns is "sickness or absence."

That B. B. Bouldin, of Greensboro, N. C., will succeed Harvey H. Slusser as Internal Revenue Agent at Louisville is announced.

The whereabouts of Mrs. Emmaline Pankhurst, the militant suffragette leader, a mystery to the London police, who are seeking to arrest her.

The readers of this paper will be pleased to learn that there is at least one disease which science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars to any person who can fail to cure himself of Catarrh after taking Hall's Catarrh Cure.

MOTHER KILLS GIRL WHO GOES TO MOVIES.

Rome.—The movies and the tango were indirectly responsible for the murder of a girl by her mother at Tivoli. The mother had forbidden her seventeen-year-old daughter from seeing a film of the tango because of the ban placed on the dance by the Roman Catholic Church. The daughter defied the mother and attended the show. Her mother met the girl when she was returning home and beat her furiously with a stick. The girl's skull was injured and her collarbone broken and she died two days afterward. The mother has been arrested.

THE EARTH'S INTERIOR A REGION FOR SPECULATION.

A strictly scientific contribution to knowledge, in the form of a discussion of some of the results incidental to the triangulation work done by the Coast and Geodetic Survey, is presented by Grove Karl Gilbert, of the United States Geological Survey, in a short paper on the "Interpretation of Anomalies of Gravity," recently published by the Geological Survey as Part C of Professional Paper 85.

After stating the anomalies of gravity which are also expressed graphically on the map of the United States accompanying the paper, Mr. Gilbert discusses the interpretation of these anomalies under the assumption of imperfect isostatic adjustment, vertical heterogeneity of the crust, and variation of depth of compensation. The geologic relations suggested by the map showing the geographic distribution of the anomalies are next set forth.

The speculative nature of this scientific contribution is well expressed by Mr. Gilbert in the few sentences that introduce the section discussing interpretation by nuclear heterogeneity:

"The inner earth is the unalienable playground of the imagination. Once it contained the forces of blacksmith gods; or it was the birthplace of our race, or the home or prison of disembodied spirits. Later Symmes hollowed from it a vast habitable empire, conceived like the world of Korsh. Science now claims exclusive title but holds it chiefly for speculative purposes; and the freedom of speculation practically recognizes but two limitations: The inner earth is dense, and it is rigid. As to all other properties opinion is untrammelled. "It is my own view that the inner

part of the nucleus is not merely hot, but very hot. If the law of compression by pressure and the law of expansion by heat, as we know them at the surface, apply equally to the nucleus, then the mean temperature of the earth must be enormous in order to afford a mean density so low as 5.6. An enormous temperature implies an enormous store of heat."

NINE-FOOT STAGE

In The Ohio Has a Gloomy Outlook Says Congressman Who Wants Work Pushed All Along The Line.

Washington.—Representative A. J. Burchfield, of Pittsburg, a member of the House Rivers and Harbors Committee, made an attack on the methods being used in connection with the work on the nine-foot stage from Pittsburg to Cairo project on the Ohio. Discussing the situation, he said:

"With nearly \$9,000,000 available but lying unexpended in the treasury, and with the work lagging in a most discouraging manner, the fact is that the project for the canalization of the Ohio is making very poor progress. I doubt it any of the advocates of the nine-foot channel realize that during the last thirty months not a lock or dam has been completed. Perhaps they also do not know that the last two times the government advertised for bids on this work no contractor wanted the work. By the provisions of the act of 1910 the government is committed to the policy of completing the fifty-four locks and dams necessary to carry the project through within a period of twelve years. At the rate we are now going, it will take a great many more than twelve years."

"From now on my efforts will be devoted to placing the entire project under the continuing contract system, so that the money will be appropriated each year in the sundry civil bill, as it is needed. If this is done the large contracting firms can bid on two or more of the locks and dams or the government might find it feasible to bring some of the machinery from the Panama Canal and put it to use on the Ohio River. I feel certain I will be able to have Congress adopt this plan in dealing with the Ohio instead of doing the work piecemeal, as it has been done up to this time. Something must be done to hurry the work along. It is dragging along in a manner that makes it doubtful if it will be completed within the present generation. This should not be. There is plenty of money available, and it requires only the same business-like treatment adopted in the construction of the Panama Canal to bring the Ohio

River project to a successful completion within a reasonable time.

"For two and a half years we have had high water in the Ohio most of the time and it has been impossible to make headway. Two dams in an uncompleted state have been swept away by floods, making the labor put upon them a complete loss. Contractors are wary of bidding upon these locks and dams because the bed of the river is upon what is known as Trenton rock and it is dangerous as an engineering proposition. I realize that these and other factors are responsible for delays and for the fact that nearly \$9,000,000 appropriated for the project has not been used and is to be reappropriated in the bill now before Congress. Therefore, we must find a way to remedy these conditions."

ROBERT'S REPORT

Shows There Was \$1,866,619.157 In Nation at Close of Year.

Washington.—There was \$1,866,619.157 in gold coin and bullion in the United States at the close of the last fiscal year.

A report by George E. Roberts, Director of the mint, says of this amount about \$1,250,000,000 was in the possession of the Government and the rest in banks.

The stock of gold reported by the banks and treasuries of the world, Mr. Roberts said, is greater by \$240,000,000, than in the preceding year, although the production of gold in the last five years has not been great.

There's a Reason For Aches and Pains

POSTUM

In place of coffee, has put many a man and woman on the Road to Wellville.

Postum is made of prime wheat and a small portion of molasses. It has a delicious Java-like flavor, but none of the drugs, "caffeine" and "tannin" which make coffee a health destroyer.

If your own judgment leads to a trial of Postum, for, say ten days, and you begin to sleep soundly, digest food better, and your nerves get steady, these signs of returning health will show.

"There's a Reason" for POSTUM

Postum now comes in two forms. Regular Postum—must be well boiled. 15c and 25c packages. Instant Postum—a soluble powder. A teaspoonful, stirred in a cup of hot water, makes a delicious beverage instantly. 30c and 50c tins. The cost per cup of both kinds is about the same.

A GEORGE WASHINGTON BIRTHDAY PARTY.

Nowhere was there a more enjoyable party in remembrance of the "Father of Our Country" than the one given by Miss Martha Stanley Lovel, at the elegant home of her parents, Mr. and Mrs. Lee Lovel, in East Third street, on Saturday afternoon from 2 to 4 o'clock.

The guests to the number of fifty were reminded of the day by the decorations. At various tables were seated young people enjoying themselves at five hundred. It was indeed a joyous crowd of young people.

Then the refreshments were dainty and George Washington was in evidence. The cherry tree, the hatchet and we were school boys and girls once more.

It was a happy thought of Miss Martha most artistically carried out.

A delightful afternoon was enjoyed by the young hostess and her guests. All wished George had a birthday every week at Miss Martha Stanley Lovel's home.

LETTER WASHINGTON PENNED

Masonic Epistle Over Hundred Years Old, Still Well Preserved.

(Lexington Herald.)

Mrs. William Kerr, mother of the Kerr Brothers, the well known undertaker and horseman, respectively, was exhibiting yesterday to her friends an original letter from George Washington, the first president, whose birthday anniversary was celebrated in many rites last week. The letter was written in ink on December 28, 1796, to the members of the Masonic Grand Lodge of Pennsylvania.

While Mrs. Kerr is unable to trace the detailed history of the letter, which is in excellent state of preservation, about 118 years old, her grandfather, James Skinner, of Virginia, was a personal friend of Washington's, and it is through him and his son, William Skinner, who was Mrs. Kerr's father, that the letter has been handed down. William Skinner was four years old when Washington died in 1799, and the letter has been preserved in his old family Bible for the last hundred and more years.

The letter is as follows:

Washington's Letter.

December 28, 1796.

Fellow Citizens and brothers of the Grand Lodge of Pennsylvania:

I have received your address with all the feelings of brotherly affection mingled with those sentiments for the Society, which it was calculated to excite.

To have been in any degree an instrument in the hands of Providence to promote order and union and erect upon a solid foundation the principles of government, is only to have shared with many others, in a labor the result of which, let us hope, will prove through all ages a sanctuary for the brothers and a lodge for the virtues.

Permit me to reciprocate your prayers for my temporal happiness and to supplicate that we may all meet thereafter in that eternal temple whose builder is the great architect of the universe.

G. WASHINGTON.

Farmers

Have you ever tried our way of borrowing money to pay for a farm?

You, of course, know that most farms are sold for one-third cash and the balance of the payment is represented by lion notes due in one and two years. You also know that there are times when it is impossible to pay these notes when they become due.

Our specialty is lending money on good farms for LONG PERIODS. Wouldn't you rather have five years to pay the balance than two years?

Any one expecting to buy farms this March will do well to come in and consult us about getting the money.

We have been giving satisfactory service for 24 years.

TELEPHONE POSTAL CARD BEING CONSIDERED.

The postmaster-general is considering the adoption of a new form of post card which will show not only the ordinary street address of the recipient but his telephone number also, according to the March Popular Mechanics Magazine. Upon its arrival at destination, a clerk would immediately call up the telephone number and ask for the person to whom the card is addressed and the message, after which the card would be delivered in the usual way. The card would bear a special stamp, costing five cents, and would have preference over other first-class mail matter in the same manner the special-delivery letters do now. A reply postal card would be 10 cents. The number of words might be limited, and no liability assumed by the postal authorities other than that now borne in the special delivery letter.
